- Automata

---

## EXPERIENCE

UnravelCloud | Woodland Hills, CA

06/2019 - 06/2020

Frontend Web Developer

Web-based dashboard optimizes and monitors cloud accounts providing costs and usage data

- Made API calls to retrieve data from the backend to display on the frontend using React/JSX
- Set up React-Router to display multiple accounts and their respective activities all on one single page
- Utilized ES6 features such as destructuring, arrow operators, and ES6 classes on a daily basis to maintain and update the interface

---

## PROJECTS

React Blackjack

11/2019 - 12/2019

Blackjack game built entirely in React

- Added additional players to existing codebase to mimic real life Blackjack tables.
- Created unique playing strategies for said additional players.

CSUNHub

02/2019 - 05/2019

Website that allows users to sell/buy books and share notes with classmates

- Designed a frontend interface using React with Bootstrap
- Moved images from local storage to cloud based image management system
- Architected state management system using Redux

---
