EXPERIENCE

UnravelCloud | Woodland Hills, CA   06/2019 - 06/2020
Frontend Web Developer
Web-based dashboard optimizes and monitors cloud accounts providing costs and usage data

- Made API calls to retrieve data from the backend to display on the frontend using React/JSX
- Minimized Time to Interactive (TTI) by ~200 ms with route-based chunking via Webpack module bundlers.
- Refactored codebase to utilize ES6 features such as destructuring, arrow operators, and ES6 classes.

PROJECTS

React Blackjack   11/2019 - 12/2019
Blackjack game built entirely in React

- Added additional players to existing codebase to mimic real life Blackjack tables.
- Created unique playing strategies for said additional players.

CSUNHub   02/2019 - 05/2019
Website that allows users to sell/buy books and share notes with classmates

- Designed a frontend interface using React with Bootstrap
- Moved images from local storage to cloud based image management system Cloudinary
- Architectured state management system using Redux
